

Teknek DCR Pad & Rollers

Roll off contamination. Roll on greater yields.

The Roller

The DCR 4,6 and 12 are simple and easy to use. Just roll the specially formulated elastomer roller in steady passes over the surface to be cleaned. No downward pressure or wrist movement is required.

The unique elastomer roller works in either direction and removes dust, lint and contamination down to one micron from any flat surface.

Available in 3 roller types:

- ★ Panel roller for rigid panels
- ★ Film roller for flexible substrates
- ★ F3 roller for thin films

Teknek's distinctive robust handle has been ergonomically designed to be comfortable and simple to use - tested and developed for everyday use in the work place.

The Pad

To clean your roller, remove the protective layer from the top sheet of the waste pad to expose the special adhesive. Roll the contaminated roller on the pad. The dirt is promptly transferred to the pad for permanent removal from the environment.

The Teknek pad is formulated with high performance, ultra thick adhesive for the longest life.

The Pak

Teknek DCR pad and roller set comes with durable pallet for storing them either on the table top or for wall mounting.

DCR pads, rollers and refill pads.

DCR roller being refreshed.

DCR SERIES	CLEANING WIDTH	WEIGHT
DCR 4	101mm/4"	210g/0.46lbs
DCR 6	152mm/6"	225g/0.50lbs
DCR 12	304mm/12"	365g/0.80lbs
