THE TEKNEK FASTPAD

The powerful combination of Teknek polymer rollers and Teknek Pre Sheeted Adhesive rolls (as used in our Clean Machines) is now available as a bench top work station.

The Teknek hand roller is cleaned automatically when it is placed into the FastPad holder, ensuring that the roller will not re-contaminate the next part to be processed. The number of repetitive actions required in the operating cycle is reduced, making the process quicker. More contamination control in less time!

The FastPad platform is available with the full range of Teknek cleaning engines. The ESD roller with sheeted Filmic adhesive provides the first fully silicone free cleaning combination on the market.

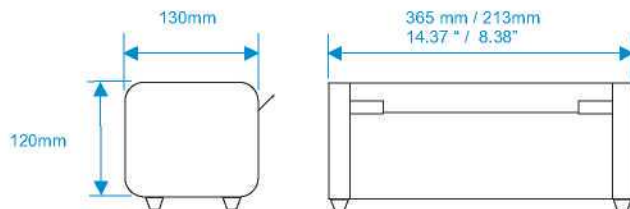

FEATURES	BENEFITS
Uses Teknek cleaning engines	Most efficient cleaning system on the market
Small Footprint	Creates extra work space
Easy to use, no operator training	Can be integrated immediately
Complete coverage of the adhesive	Lasts longer
Thicker adhesive coating	Holds more contamination
Reduced number of wrist actions	Quicker, safer operating procedure
Exposed adhesive area is small	No accidental scrapping of product being cleaned

TECHNICAL SPECIFICATION

Widths 6" / 150mm and 12" / 300mm (use only Teknek hand roller)

Power 12 vdc (120/240 ac mains adapter supplied)

CE compliant

Product specification subject to change.
